Clearing the Cache on EDGE (Windows/Microsoft)

When you login to any website your browser stores a small packet of information called a "cookie" which authorises your login. These cookies should automatically expire. However, sometimes they don't which causes confusion for your browser as it then doesn't know which one to use. Clearing the 'Cache' removes these expired cookies enabling you to login again.

- First, ensure that you are logged out of the BernardMageeBridge.com website
- Next, open the Edge web browser
- The Microsoft Edge browser is the one with an icon that looks like this:

• Now click on the three dots on the top right hand corner

				\times

Clearing the Cache on EDGE (Windows/Microsoft)

• In the drop-down menu click on "Delete browsing data"

• This will **open** a **pop-up list** (see below). **Tick** the **first four boxes** as shown (this may already be done for you) and **click** "**Clear now**"
