Disable Prevent Cross-Site Tracking – Modern iPad

If you encounter **issues viewing** any of our '**Live Shows'**, one solution may be to **enable 'Site Tracking'** on your device. This can only be done on your own device in the browser settings.

1. Go to the Settings in your browser – e.g. Google / Edge / Firefox / Safari

2. Then **search** in the '**Privacy & Security**' Settings for '**Site Tracking**' or to '**Allow Cookies**' – and ensure that this is **enabled**

On a MAC computer on Safari ensure 'Prevent cross-site tracking' is NOT selected:
